his music reaches inward to connect to emotions that promote health

and acting on medical knowledge relies upon industry-funded and industry-promoted studies meant to differentiate

a man who undergoes transrectal biopsy has a one in four chance of being diagnosed with prostate cancer, yet most of these cancers will be the indolent type that men die with, not from.

i don't have the scientific knowledge to defend or attack the findings of the many opinions on this subject but i am merely throwing it into your debate
